

How to build a

Radionics Device

That works by  
Mind Power

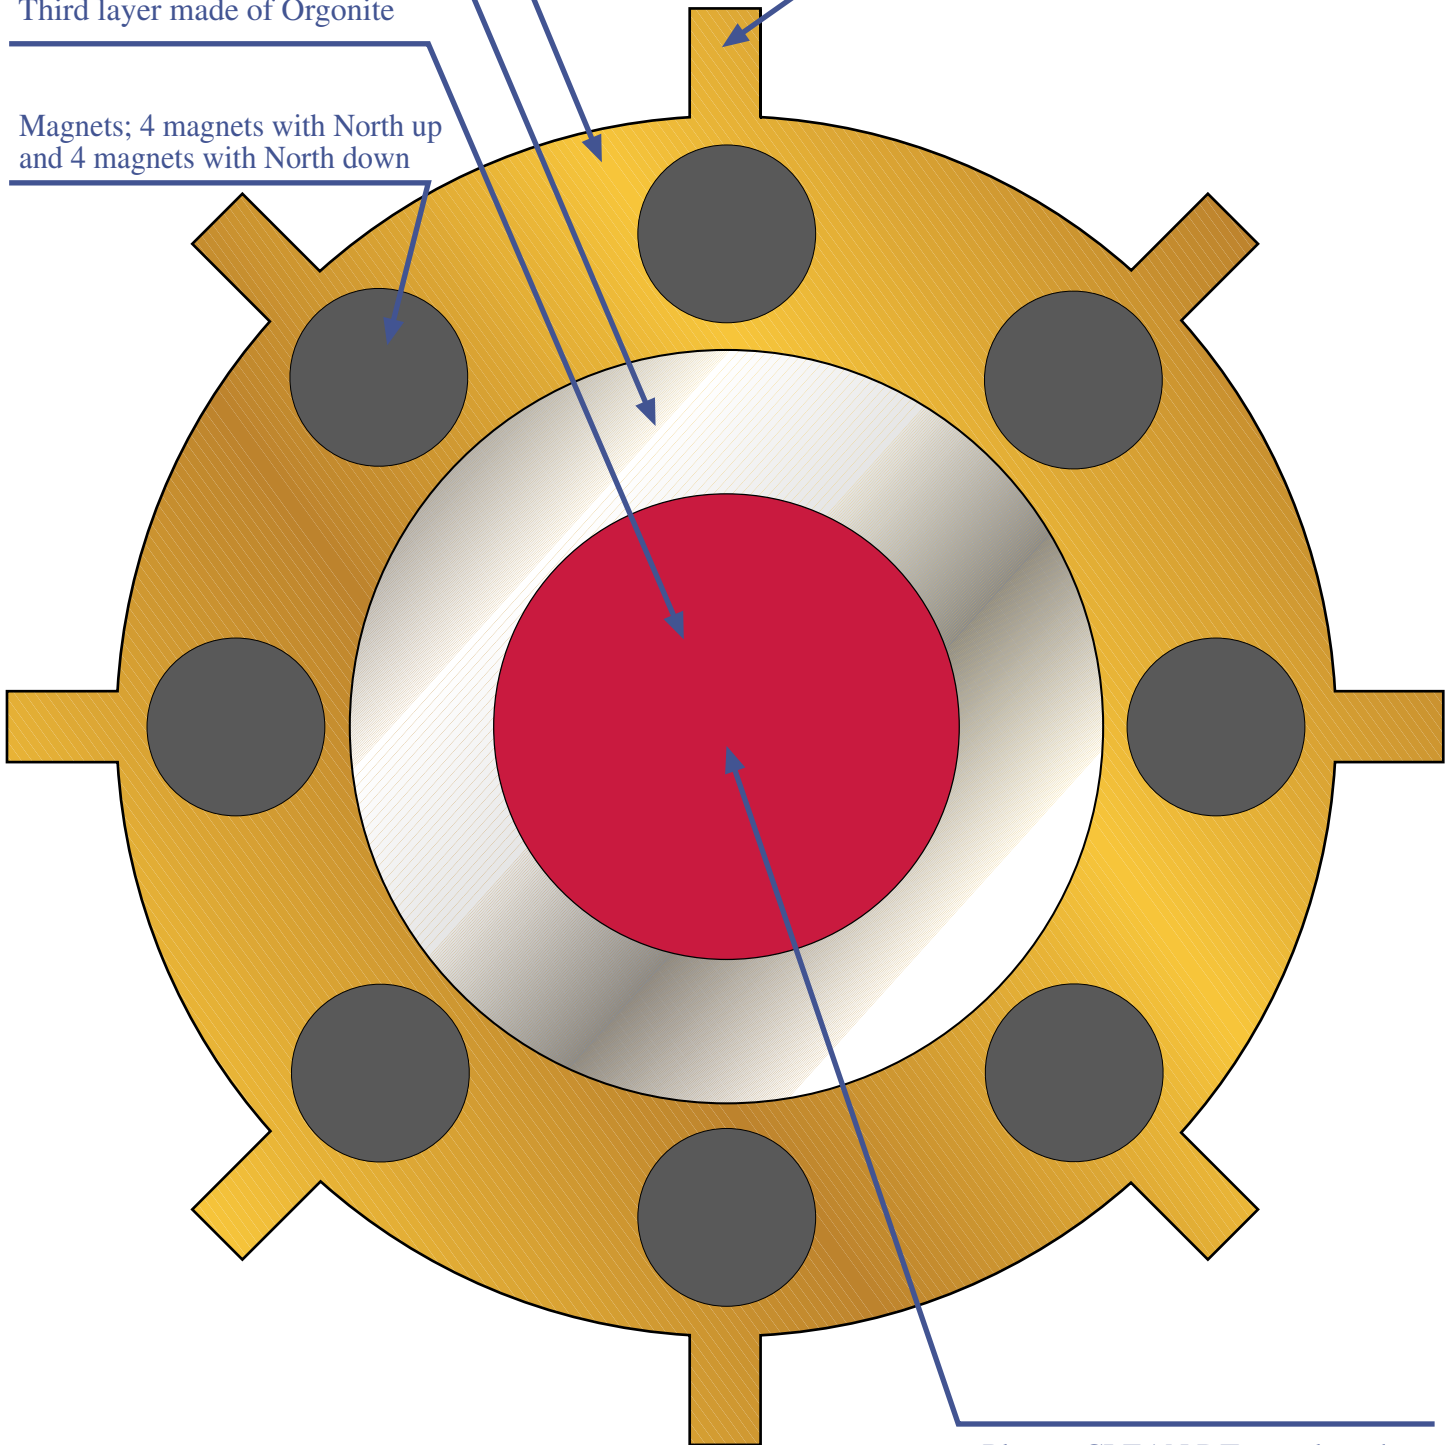

First layer made of copperfoil

second layer: mirror  
(try to get the best quality)

Third layer made of Orgonite

Magnets; 4 magnets with North up  
and 4 magnets with North down

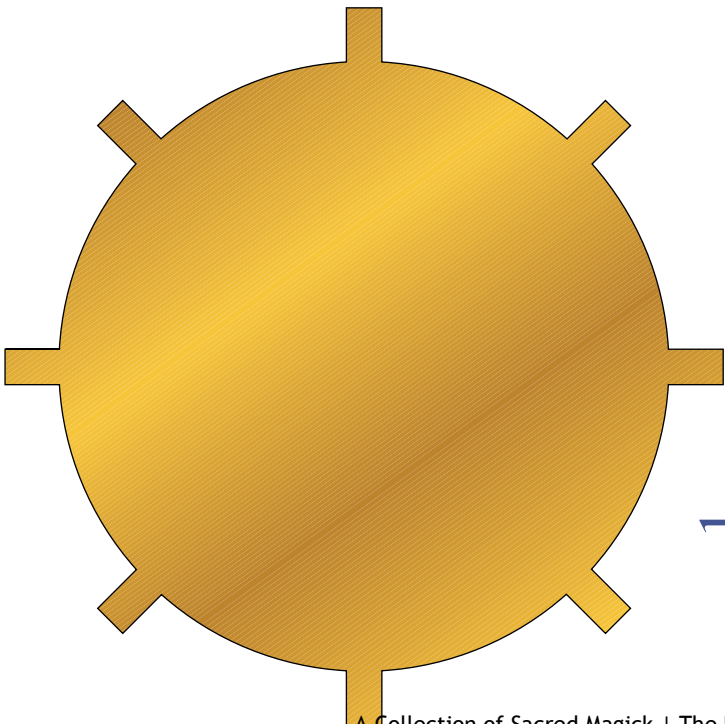

Connectors; use two to connect  
to the dials, two to connect  
to an antenna (or witness coil),  
two to connect to the rubbing plate  
and two to connect to the headband.

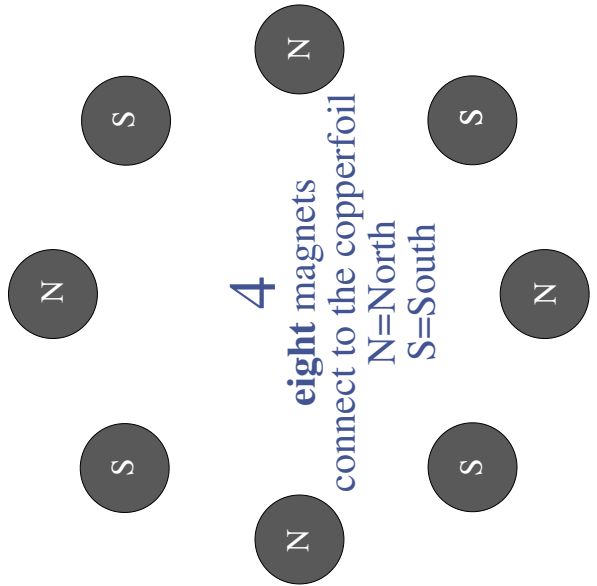

Place a CLEAN DTcrystal on the  
third (orgon) layer, use tape to  
connect, but NEVER use glue!!

# Radionic Heart

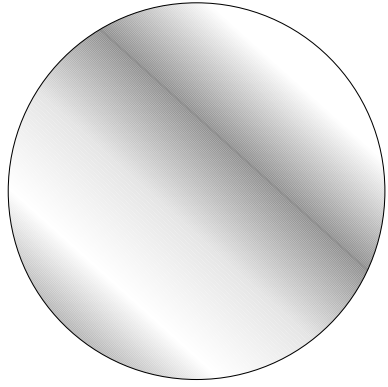

this is the heart of the device,  
see next page to find more instructions

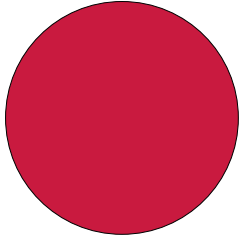

**1**  
this shape is made of  
copperfoil.  
1st layer

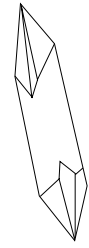

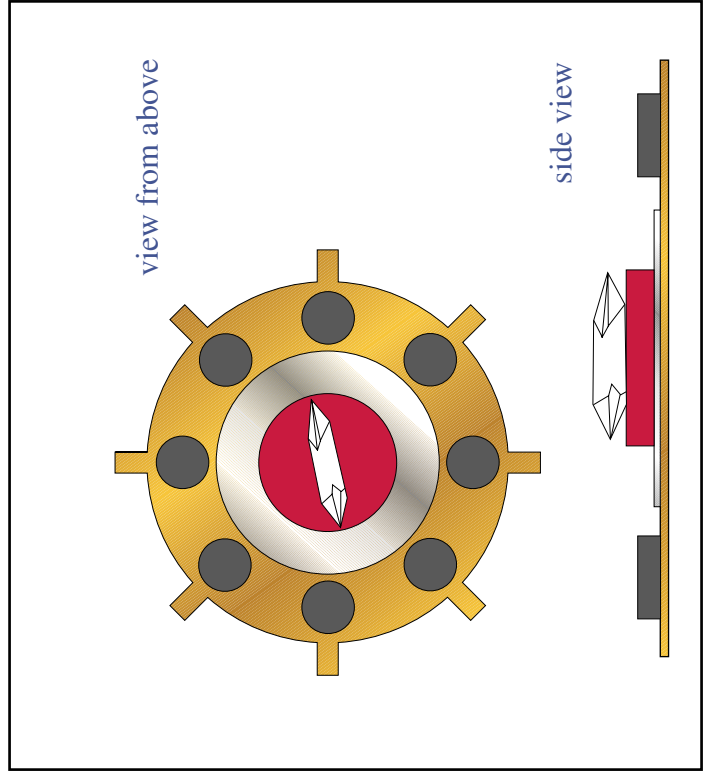

**4**  
**eight magnets**  
connect to the copperfoil  
N=North  
S=South

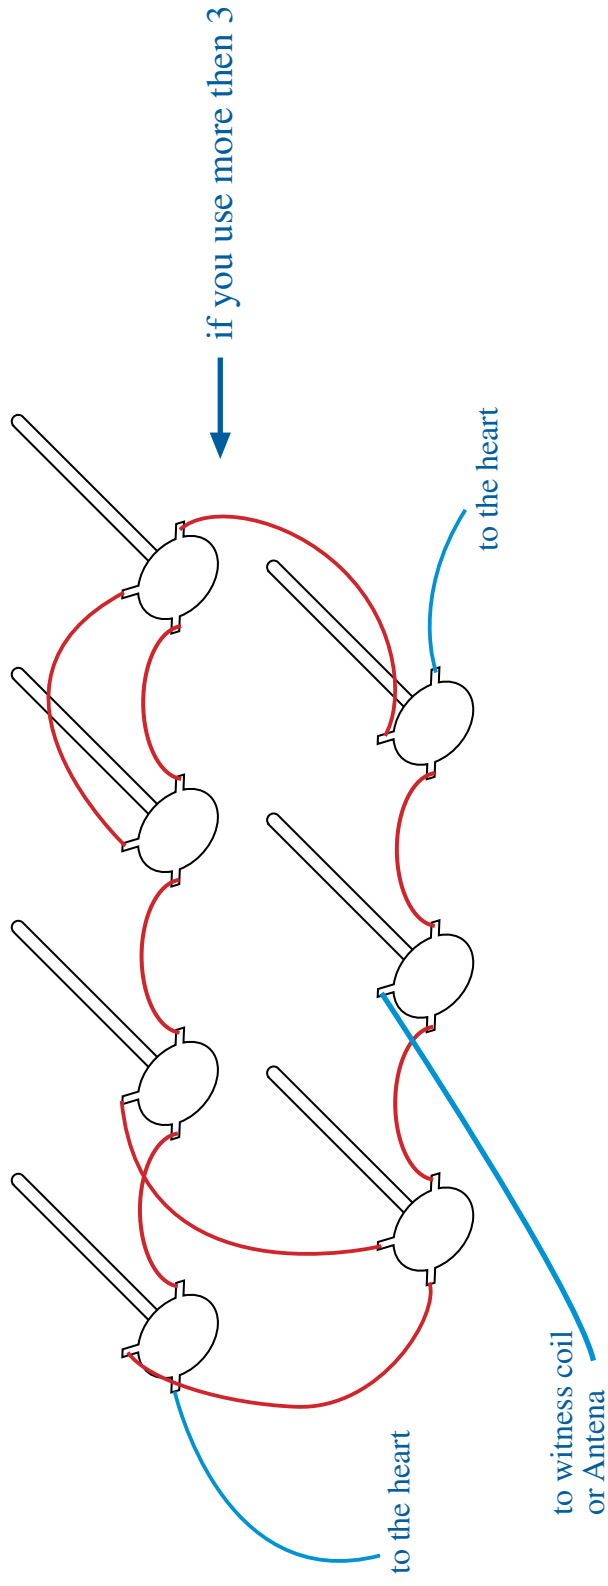

**2**  
this is a  
mirror.  
2nd layer

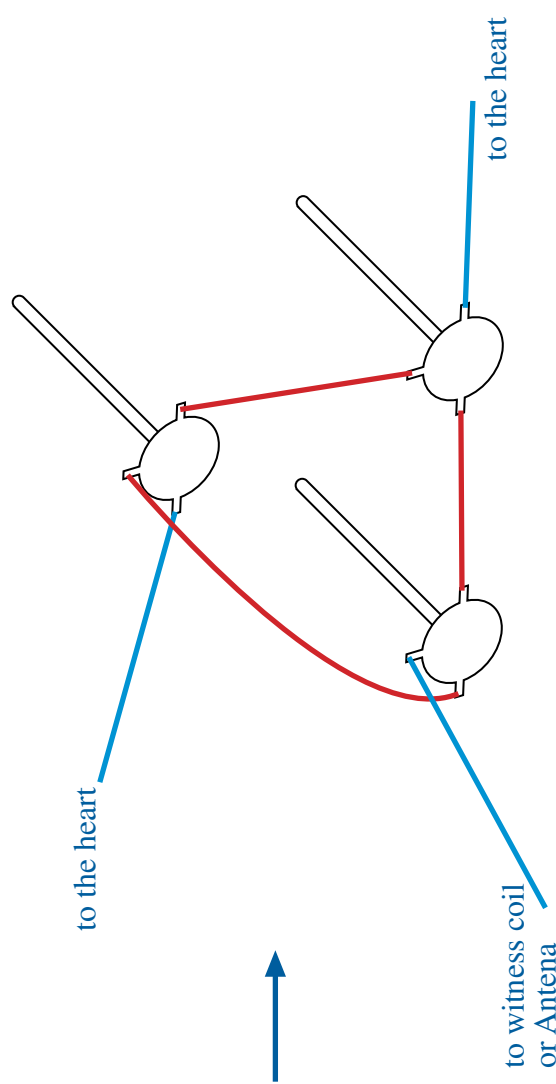

**3**  
made of orgonite  
1 cm thick.  
3rd layer.

**5**  
double terminated  
quartz crystal

## How to connect the dials

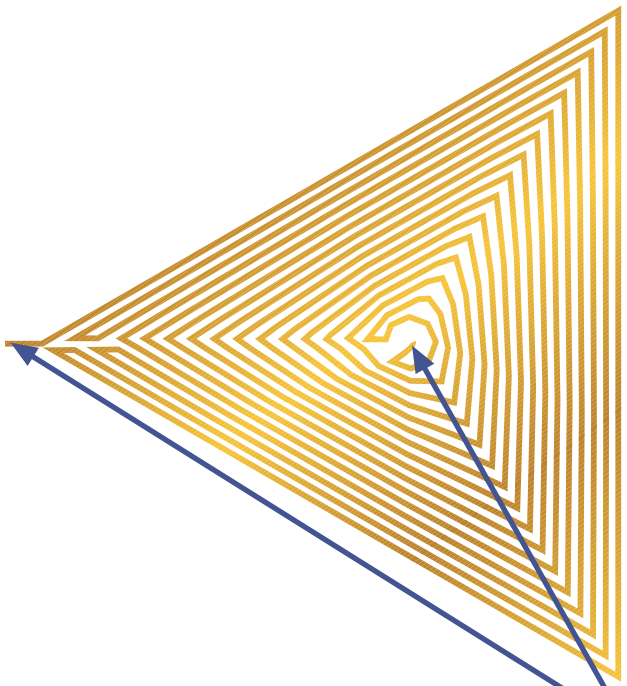

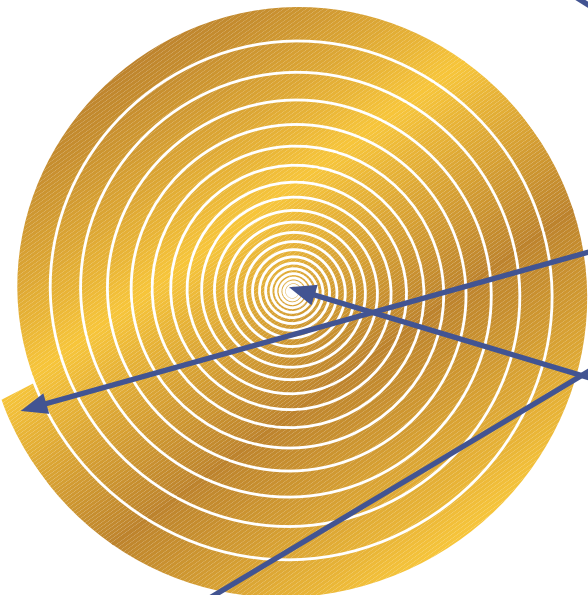

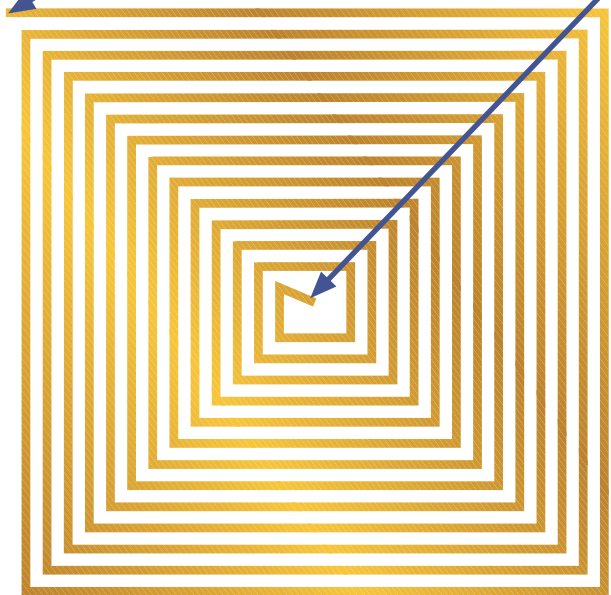

if you use 3 dials  
(don't use less!!)

The dials are potentiometers:  
10KW, Wattage 1/2W., Tolerance 20%,  
6mm shaft for knob, Mount in a 5/16" -diameter hole.

Use this shape

or this one

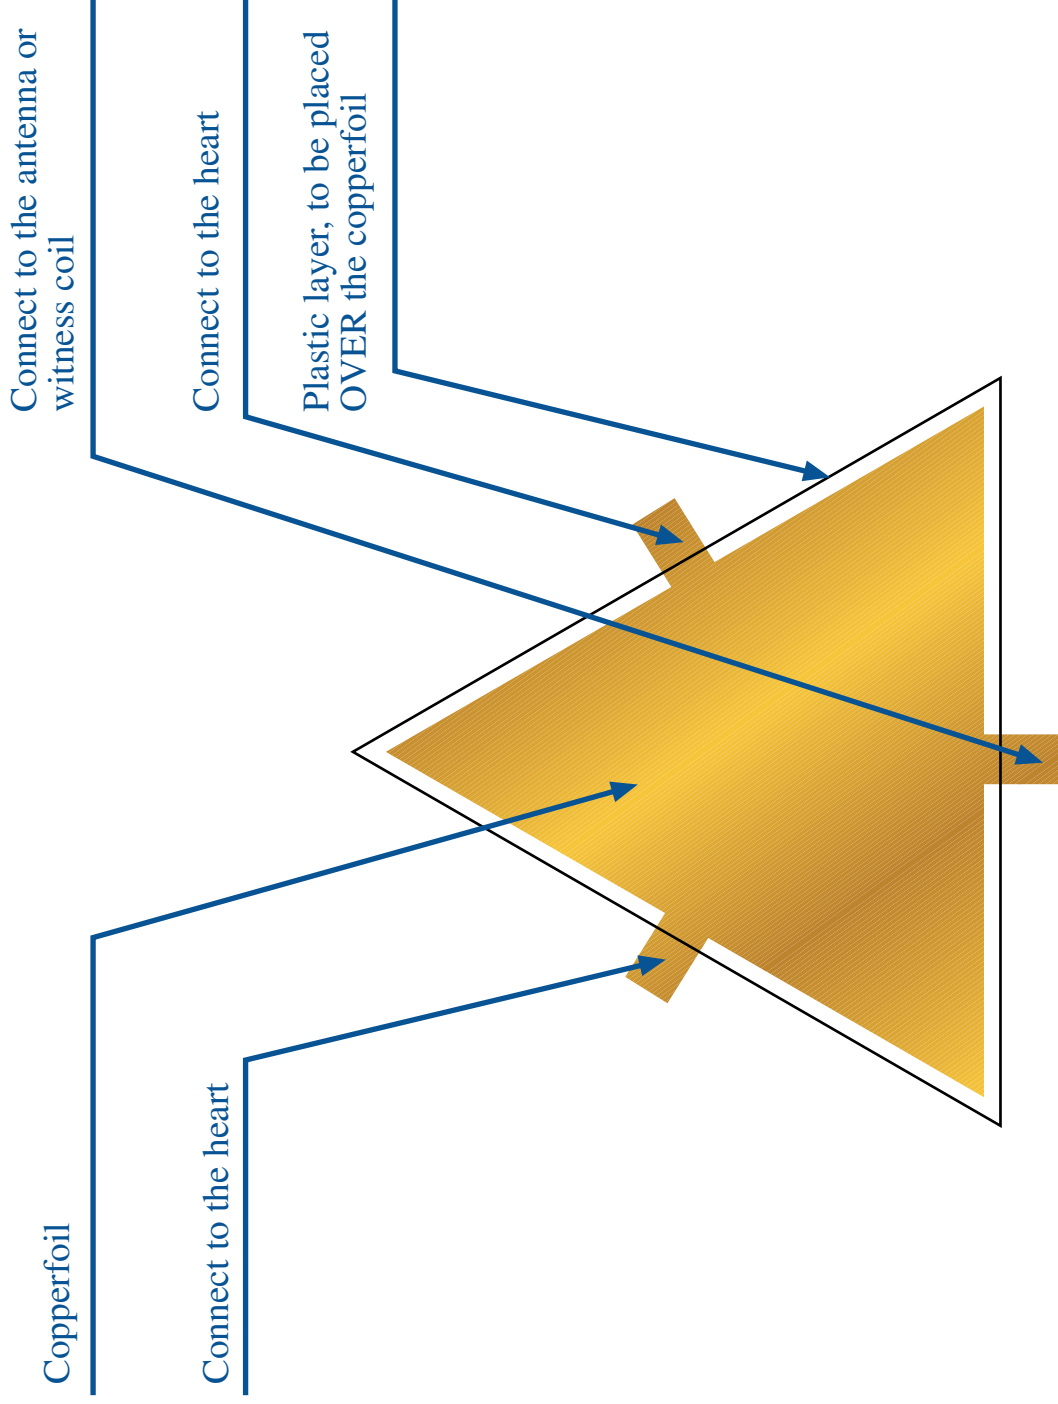

or this one

connect to headband and rubbingplate

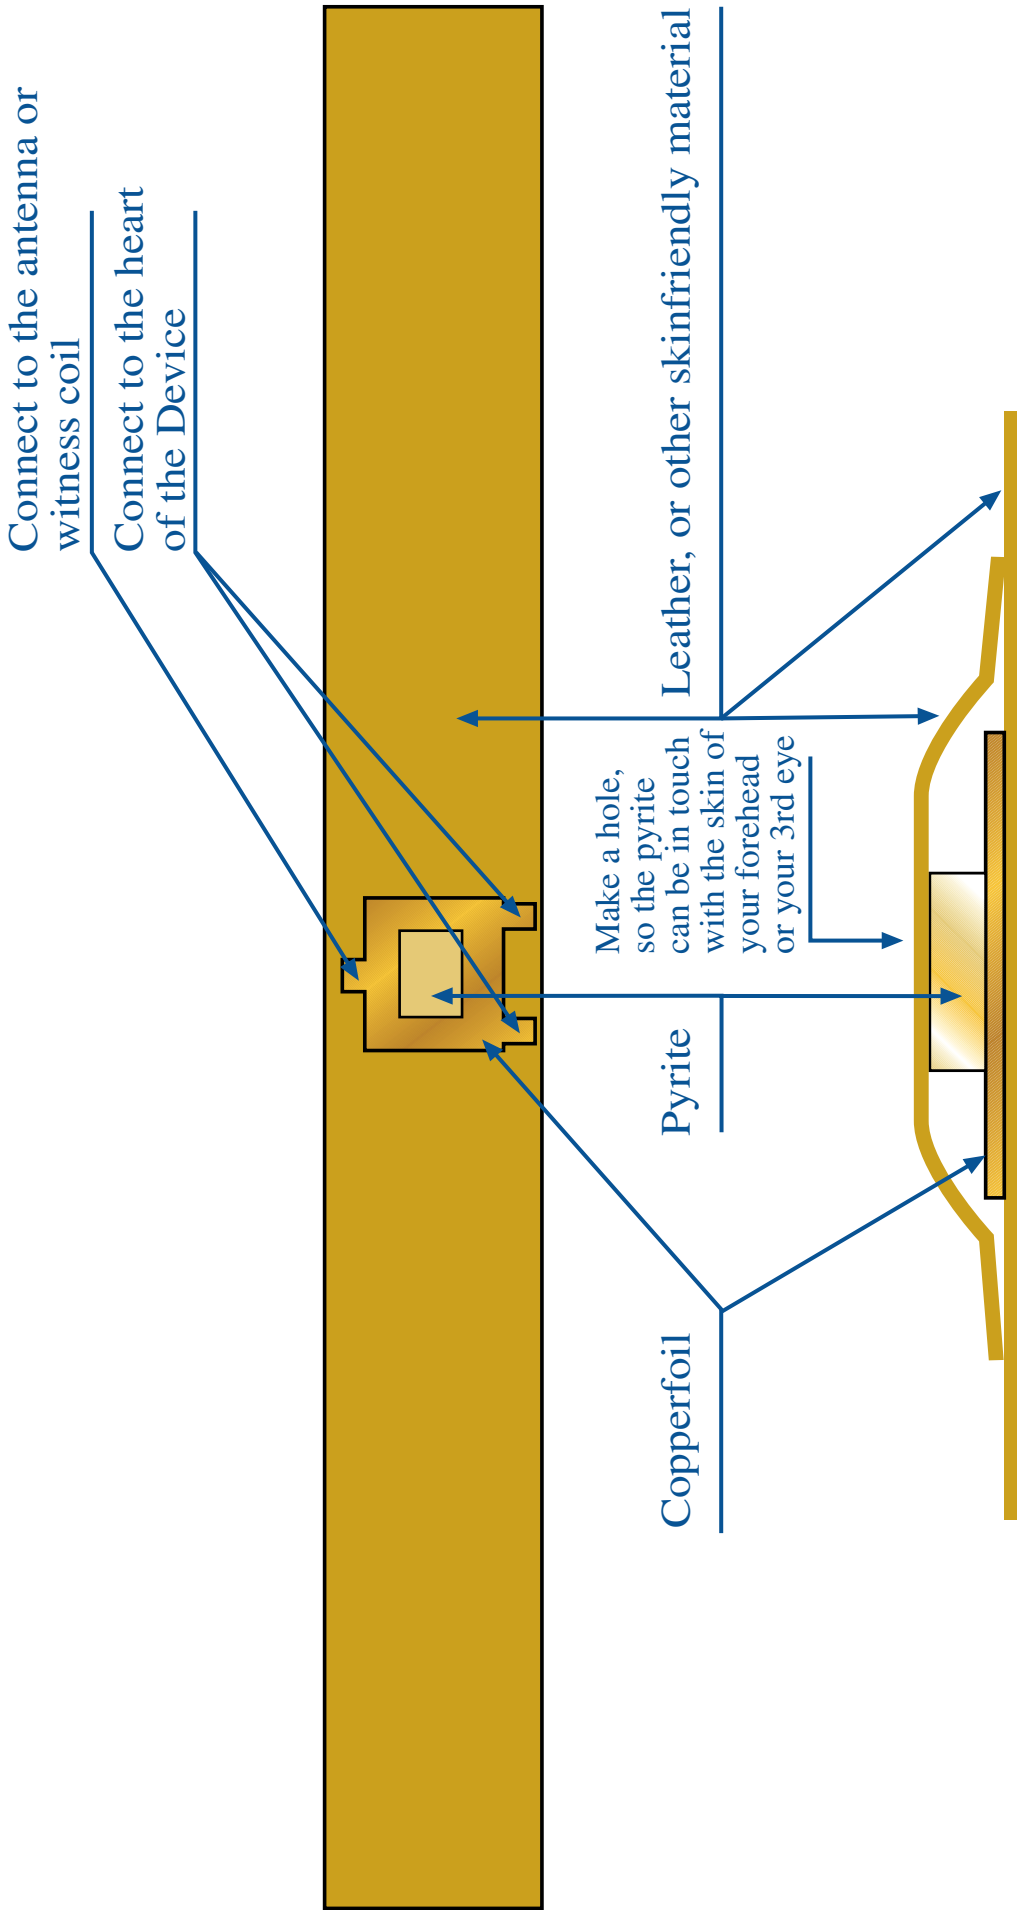

# Witness coil

# Rubbing plate

( I use this triangle shape, but you can use any shape you want)

# Headband

use skinfriendly material like leather
