

Anti-Viral Protocol (A Wellness Perspective)

Patent Number (10130701) for the Coronavirus: [Corona Virus Patent Number](#)

Disclaimer: This is not intended to be a substitute for medical advice, diagnosis, or treatment. Always seek the advice of your physician. Orthomolecular physicians have specific training in micronutrients and are able to answer questions regarding nutrients that support the immune system.

Micronutrients are most effective when used as part of daily regimen, at first exposure or within 24 hours of symptoms. They rarely are effective when used as a last resort after a virus has been allowed to multiply. Typically, the more agents, the better. Hitting the viral with many agents immediately is better than a gradual approach.

Three Agents for Coronavirus

Colloidal Silver	Prevention Dose	10 ml BID; hold under tongue for 1 min, then swallow	
	Sick Dose	4 oz Single Dose + 1 oz Every Hour until well	
	Spray	Spray on face, hands, eyes, etc., disinfect surfaces	
CIO2	Prevention Dose	1 drop (each) every hour added to 8 ounces of water	
	Mix in shot glass	Sick Dose	3-6 Drops (each) every hour added to 8+ ounces of water
	Wait 1 min/add to H2O	Spray	20 Drops/ounce, put on face, eyes, hands added to water
		Humidifier	9 Drops per liter of water
Herbs	Rosemary, Oregano, Licorice Root, Forskolin, Curcumin (I personally prefer the agents below)		

Additional Immune Supports

D3*	D3 Daily 5,000 mg or ONCE PER WEEK at 50,000 mg (check levels)
Folvic/Humic Acids*	Vital Earth Folvic and Humic Acids
Glutathione	Nanoglutathione
